Greens Fertilizer Specifications

Anderson's Contec DG 17 – 0 – 17

Result Expected:

- 1) Quick greening plus sustained feeding with no surge growth.

General specification:

- 1) Fertilizer must be specifically formulated for golf course putting greens.
- 2) Fertilizer must contain nitrogen, phosphorus and potassium.
- 3) Must be non-caking.
- 4) Must spread uniformly and easily.
- 5) Must be dry applied, granular, odorless and dust-free product.

Detailed specifications:

- 1) Fine size granulation.
- 2) Low burn potential.
- 3) Guaranteed analysis of 17% nitrogen; 0% phosphorus; 17% potassium.

Greens Fertilizer Specifications

Anderson's DG 14 – 7 – 14

Results Expected:

- 1) Quick greening plus sustained feeding with no surge growth.

General Specifications:

- 1) Fertilizer must be specifically formulated for golf course putting greens.
- 2) Fertilizer must contain nitrogen, phosphorus, and potassium.
- 3) Must be non-caking.
- 4) Must spread uniformly and easily.
- 5) Must be dry applied, granular, odorless and dust-free product.

Detailed Specifications:

- 1) Fine sized granulation.
- 2) Low burn potential.
- 3) Guaranteed analysis 14% nitrogen, 7% phosphorus, 14% potassium.

Greens Fertilizer Specifications

K Turf Fertilizer: Analysis 0 – 0 – 50

- 1) Potassium Source: 100% sulfate of potash.

Amount Needed:

- 1) 30 bags

Results Needed:

- 1) Quick greening plus sustained feeding with no surge growth.
- 2) Fertilizer response must last 10 to 12 weeks.

General Specifications:

- 1) Fertilizer must contain 0% nitrogen, 0% phosphorus, 50% potassium.
- 2) Must be non-burning.
- 3) Must be non-caking.
- 4) Must spread uniformly and easily.
- 5) Must be dry applied, odorless, and dust-free product.

BIDDERS PROPOSAL – FAIRWAY FERTILIZER

Bidder shall submit literature describing the products they propose to furnish as well as a complete set of specifications on the products.

We hereby propose to supply materials as set forth in the attached pages of specifications.

Rough Fertilizer Specifications

Amount Needed:

- 1) 10 to 20 Tons in 1000 lb. Bulk Bags.

Results Needed:

- 1) Quick greening plus sustained feeding with no surge growth.
- 2) Fertilizer response must last eight to ten weeks.

General Specifications:

- 1) Fertilizer must contain 21% nitrogen, 3% phosphorus, and 21% potassium.
- 2) Must be non-burning.
- 3) Must be a sulfur coated slow-release urea nitrogen product.
- 4) Must be non-caking.
- 5) Must spread uniformly and easily.
- 6) Must be dry applied, granular, odorless, and dust free product.

Detailed Specifications:

- 1) Apply in mid-June with non-burning and No watering in.
- 2) Medium size granulation.
- 3) Guaranteed analysis of 21% nitrogen, 3% phosphorus, 21% potassium.
- 4) Nitrogen Breakdown:
 - a. Water soluble nitrogen from:
 - i. Ammoniacal nitrogen 1.15%
 - ii. Urea Nitrogen 5.67%
 - b. Slow-release nitrogen from:
 - i. Sulfur coated slow-release urea nitrogen 14.18%
- 5) Percent of slow-release nitrogen must be 75%
- 6) Must have a 2 – 1 – 2- nutrient ratio that is formulated to both an immediate and sustained response.
- 7) All of the nitrogen must be available to the turf grass within one (1) growing season.
- 8) Phosphorus derived from:
 - a. Ammoniated phosphate
- 9) Potash derived from:
 - a. Sulfate of potash
- 10) Must also contain 10.35% sulfur
- 11) Must be CIL. N5-56 sulfur coated slow-release urea nitrogen product.
